

# Haishan Ye

Software Engineer at Apple

---

## Summary

N/A

---

## Experience

### Software Engineer at Apple

July 2015 - Present

### Software Engineer Intern at Idealab

September 2014 - December 2014 (4 months)

My responsibilities mainly included:

- Built a custom Email card view and reduced memory usage by applying view reuse mechanism
- Constructed fully featured calendar view component for GlanceAt mail client
- Defined and developed customized filters to process Emails in certain contexts

### Software Engineer Intern at TiVo

June 2014 - August 2014 (3 months)

My responsibilities mainly included:

- Designed and implemented a Today View extension prototype using iOS 8 new APIs
  - Proposed new features based on iOS 8 investigation, which will be applied in upcoming version
  - Improved third-party library management workflow by integrating CocoaPods into current project
-
