Software Engineer at Facebook

---

## Summary

N/A

---

## Experience

### **Software Engineer at Facebook**

May#s 2016 - Present

### **Sr. Software Engineer at LinkedIn**

Eylül 2015 - May#s 2016 (9 ay)

### **Software Engineer at LinkedIn**

Eylül 2014 - Eylül 2015 (1 y#l 1 ay)

### **Software Engineer, iOS at FuzeBox, Inc.**

Eylül 2013 - Eylül 2014 (1 y#l 1 ay)

### **Software Engineer at Wallit**

Mart 2012 - Eylül 2012 (7 ay)

I have designed & developed several components in Wallit app in Objective-C. My notable contributions include wall updates, favorite walls, user's walls and Twitter login enhancements. I am in charge of developing important components in Wallit v2 such as news feed, friends and user profiles.

### **Intern at Mälardalen University**

Haziran 2009 - Eylül 2009 (4 ay)

I developed a realtime media broadcasting system during my internship. The users can broadcast their live videos on their Android phones (developed in Java). An administrator can manage which videos will be displayed and make postproduction edit on the videos such as color filtering (developed in C#). The system is designed to support mass amount of clients.

---
