

Sanjana Maiya

Software Engineer at Facebook

Summary

Software Engineer with 5+ years of experience in Java development

Experience

Software Engineer at Facebook

January 2017 - Present

Software Engineering Intern at Facebook

June 2016 - September 2016 (4 months)

Worked in the Android News Feed team on Facebook reactions (<http://www.wired.com/2016/02/facebook-reactions-totally-redesigned-like-button/>).

My project involved improving the user experience for reactions, with a focus on users on 2G networks.

Senior Software Engineer at Novell

July 2009 - December 2014 (5 years 6 months)

- Worked in a team which handled SSL Management for an endpoint product. Was involved in the design and implementation of certificate management and re-minting for a complex product scenario.
 - Worked in a 2 member team which evaluated moving from SOAP to REST web services for an existing SDK. Implemented REST web services using Apache CXF and Jersey, and assessed each against several parameters including ease of use, documentation support, performance and scale.
 - Was in charge of a product which discovers Windows, Linux and Mac devices, and deploys the product on these devices. The deployment involved installing the product on targeted systems.
-

Education

University of California, Santa Cruz

Master's degree, Computer Science, 2015

PESIT, Bangalore

Bachelor of Engineering (BE), Computer Science, 2005 - 2009

Mount Carmel College, Bangalore
