Summary

Practice with programming since the age of 13, have since been programming small projects and applications as a hobby, and am now pursuing a career in the Computer Science field.

Objectives

Gain experience coming up with solutions to various types of computer science problems, and be able to develop large programs from the ground up.

Education

University of Texas at Dallas
Computer Science, Enrolled June 2019

Current GPA: 3.73

Relevant courses:

Completed:

- Computer Science I
- Computer Science II
- Discrete Mathematics I

Enrolled:

- Computer Architecture
- Discrete Mathematics II
- C/C++ in a Unix environment
- Probability and Statistics in CS

Hobbies & Interests

- Programming: Several hobby projects in both C++ and Java, currently learning other programming languages
- 3D Modeling: Challenging myself to make various 3D models of objects
- Electrical Engineering: I love to develop small circuits and have them interact with computer programs I've written

Professional Skills

- Peer Tutoring: I feel confident in explaining concepts to others in a one-on-one environment
- Analytical Thinking: I like to have a deep understanding of how things work, as well as how they can be improved
- Flexibility: I can adapt easily to many situations
