WORK EXPERIENCE

Software Engineer

IBM - Rocket Center, WV - August 2015 to Present

Technologies: MyBatis, Java, J2EE, KnockoutJS, Oracle, Select2js, Qunit, SpringMVC, Node, NPM, Tomcat, Weblogic, AngularJS, Node, NPM, Quartz, JQuery, Hibernate, SSO, Agile, Cloud Computing, Struts2, and many more

Supply Chain Manager (Last position held)

Container - Winchester, VA - February 2003 to August 2015

Responsibilities:

Schedule manufacturing equipment to meet sales and provide for short and long term production efficiency. Ensure that customer requirements are met.

Monitor actual production versus planned production and make scheduling adjustments as necessary.

Review the production plan for direction on utilization of equipment to meet anticipated sales forecasts.

Maintain an accurate inventory of all finished and in-process goods that meet min/max inventory goals. Provide information for proper storage of goods that will result in use of inventory on a first in/first out basis.

Coordinate downtime requests by the production team with sales requirements.
Maintain cooperative relationships with the production team, production management staff, management and administrative staff at other plants, and customers.

Prepare the physical count of weekly and month-end inventories for finished and in- process goods and reconcile inventory quantities.

Organize and report the EOM inventory analysis to accounting and investigate issues with assigned staff accountant.

Purchase colorant and production supplies as needed.

Perform other duties as requested by the Materials Manager or General Manager.
Comply with all activities related to product safety, legality, regulatory compliance, and quality.

Provide technical assistance and support to team members

Design and Implement software to update current production process (.NET and IIS)
