EDUCATION

University of Houston

Expected May, 2020

- B.S Computer Science | Current Cumulative GPA: N/A | Freshman

RELATIVE EXPERIENCE

PROJECTS

Tap | Java

An Android game built using Java, which utilizes intents and onClickListener's to move a button within the screens parameters upon user interaction for 60 seconds, after which the game ends. The app also saves the highest score using shared preferences.

Material Calculator | Java

An Android app which incorporates various layouts in order to create a material calculator view. The purpose of creating the app was to learn about xml programming and its interaction with Java.

Sunshine | Java

Sunshine is a weather app which is still being built. This app parses data from the OpenWeather API into JSON objects. The objects are then stored into an array from which the activity can call the data for it to be displayed.

PROGRAMMING LANGUAGES AND TECHNOLOGIES

- Skills: Java, Python, HTML, XML
- Tools: Eclipse, Android Studio, IDLE
