

Christopher Rodriguez

Student at San Jacinto College

crodriguez1138i@gmail.com

Summary

I enjoy problem solving and the application of logic. I am highly motivated and love to learn about nearly anything to do with computers that would allow me to better employ them to achieve ambitious goals that I associate with a vision of an exciting future for humanity.

I am particularly drawn to areas such as virtual reality, anything to do with space, and applications that would prove to be truly useful to people on a daily basis.

I'm currently attending the University of Houston-Clear Lake in my junior year as a computer science major.

Experience

Computer Science Tutor at San Jacinto College

January 2016 - Present (10 months)

Tutored computer science students and supported a computer science professor.

Education

University of Houston-Clear Lake

Bachelor's degree, Computer Science, 2016 - 2018
