ABOUT ME

I'm an avid programmer who loves to code whenever he gets the chance. I am very fond of mobile development, specifically Android but am in the process of learning iOS. I am continually looking for opportunities to take my knowledge and improve upon it outside of the classroom.

EDUCATION

Purdue University **3.46 GPA**
B.S. Computer Science **Grad. 2019**

PROJECTS

Tip Calculator **Spring 2015**
Tip Calculator is an android application I developed in order to gain experience and knowledge in Android development. I learned design features and many small elements I can use in order to improve my applications.

VOLUNTEER WORK

- * Once a month for multiple years I have gone to a local church to pack care packages to send to the troops
- * Over summer break I traveled to Flint Michigan on a mission trip in order to improve living conditions, give away food at a soup kitchen, and give hope to truly inspiring people.

WORK EXPERIENCE

- * June 2014-Present: For over two years now I have worked at Top Notch Promotions as a sales assistant even while at school. I handle most customer relations including calling customers and holding in-person meetings to discuss products
- * May 2016-Present: When I returned from school I decided to start working a second job in order to fill some time and improve my time management and efficiency while also taking an online course. I started working as a Cashier for Noodles and Company. I work with customers on a daily basis to improve food quality, eating environment, and service.

SKILLS

AVERAGE GOOD GREAT

Java

Android Development

Python

C

HTML/CSS

EXPERIENCE

I have been to six hackathons. At one of the local hackathons, my teammate and I won the award for best application. My favorite hackathon build was a flashcard app for the apple watch which utilized force touch to advance to the next card.

INVOLVEMENT

Programmer, iOS Development Club **Present**
Programmer, ACM(Application Dev) **Present**
Enthusiast, Purdue Hackers **Present**
Member, Theta Chi Fraternity **Present**
Co-President, EarthWorks **Previous**

* Within Theta Chi, I am the Academics chair. At this position, I strive to improve the academics of not only myself but my Fraternity as a whole. I work with people who are struggling to figure out how they can adjust and improve.
