***Status: MPH/ MBA Candidate Johns Hopkins University**

***Expected Graduation: May 2017**

OBJETIVE: ACCEPTANCE INTO YOUR POSITION

PRESENT POSITION:

Currently, I am doing a dual graduate program at Johns Hopkins University in Public Health and Business Administration. I am a clinician with leadership, healthcare business development and health policy research experience. Prior to this I was doing a postgraduate internship in an unprivileged rural primary health care facility near the border with Haiti, located in the province of Elias Piña, in a community named El Llano in the Dominican Republic. I am also the National President of Postgraduate Interns of the Dominican Republic through the Dominican Medical Council and a Youth Public Health Spokesperson and Campaign Coordinator for the Ministry of Public Health and Social Aid.

PROFESSIONAL BACKGROUND:

Medical School Graduate from the Autonomous University of Santo Domingo, School of Medicine since October 2013. I've been a youth public health spokesperson and campaign coordinator for the Ministry of Public Health and Social Aid of the Dominican Republic for four years. I was a research assistant for the Maternal and Child Health Department for a period of three years. I have primary care practice experience with extensive expertise in healthcare delivery in rural settings especially under-served communities.

PERSONAL SKILLS:

I have been developing in the public health field for some years now as a spokesperson, campaign coordinator and a Research Assistant in the Department of Maternal and Child Health at the Ministry of Public Health and Social Aid of the Dominican Republic, and I can humbly, but very certainly say I'm able to communicate and mobilize individuals and communities, thus I have the ability of establishing amazing interpersonal relationships. I'm a great team player, but I'm also able to work and carry out tasks independently. I address issues rapidly and have leadership traits.

I am able to handle times of stress, disaster and tension. I can easily manage technology and I have a vast experience in data analysis and presentation, can rapidly adapt to new formats and like to enrich my technical skills when required. I have eagerness in both what I'm proposed and what I propose myself. When asked to describe me, my colleagues consider me an honest, respectful, responsible and approachable person.
