Employment History:

Phonoscope, Houston, TX

July 2016 – Present

Software Developer

Developed a video conferencing web app for the internal use of the company. The app is developed using Angular.js for the front-end, Node.js for the back-end, and MongoDB as the database; otherwise known as the MEAN stack.

TexAgs, College Station, TX

September 2015- December 2015

Software Developer

Developed front-end and back-end for TexAgs.com, an online news and forum website. The site is developed using an ASP.net framework, which uses C# for the back-end and HTML/Javascript for front-end. The site also used SQL as their database.

WheyBuddy.com, Houston, TX

October 2014-July 2016

Co-Founder/Chief Technology Officer

Developed the front-end and back-end of a Cash-back website for a local start-up company in Houston. The front-end was developed using a custom bootstrap in HTML and the back-end is developed using CodeIgniter PHP framework.

Computer Science Undergraduate Teacher's Assistant

August 2014-May 2015

Provided tutorials for students needing help with Computer Science related subjects during lecture. I also held tutoring sessions to go more in depth on the subjects, such as best OOP and MVC practices.

Personal Tutor

May 2013 – May 2015

Math and Science Tutor

Developed a syllabus for college and high school students to help them succeed.

Languages

English and conversationally fluent Urdu and Hindi
