Network System Engineer
IT services - Sofia - January 2010 to October 2014

IT consulting
Location: Sofia
Company size: above 500
Additional Details: Research and analysis of customers' needs;
designing, planning and building of communication
systems and network reliable solutions in conformity with the business processes, the
specific requirements of customers from the telecommunication sector, corporate to small and
medium business.
My work for this company involved dealing with network projects, which cover all different
stages of Cisco's PPDIOO Network Cycle:

- Pre-sales - directly communicating with the customers, working in the customers'
datacenter compartments and on the shared
network infrastructure in the HPE managed
Data Centers. Preparation of technical
documentation requested by the customer,

- Sales - preparing BoMs and all technical
documentations and specifications needed in order to successfully complete the deal,

12/29/2016 CV - Nikolay Glozhenski
- Post-sales - Integration of the proposed
technical solution at the pre-sales stage.
Organizing all different technical teams
involved in the realization of the agreed
solution design. Close work with customers'

representatives. Preparing of all technical
documentation requested by the change
management processes requested by the
customer. Trainings for the support stuff and preparing of technical documentation in order to smoothly move
to production.

- Aftercare - Performing aftercare support for the integrated network solution.
Troubleshooting, when it is needed, for all
different parts of the network design
