## Experience

**Software Development Engineer at Microsoft**
February 2017  -  Present

**Software Engineer at IBM**
June 2015  -  December 2016 (1 year 7 months)

I was a full stack software engineer here, and program in Java, JavaScript, Ruby and SQL mostly. As a member in Enterprise Integration and User Management team, I worked on integrating our SaaS into client system with full security and performance consideration. Also we designed applications and services to govern the identity and authorizations to make sure  users see what they are supposed to see.

**Software Engineer at Explorys, an IBM Company**
March 2015  -  May 2015 (3 months)

Acquired by IBM

1. Delivering modular, testable, and high performing code in Ruby on Rails, Java, and JavaScript; Improving software efficiency and performance;

2. Designing and implementing new applications and software to manage the users of Explorys EPM suite software;

3. Collaborating with peers, often with pair programming, on code design and implementation;

4. Contributing to improvements in Explorys' culture and practices;

5. Coaching and mentoring less experienced engineers and educating team members on software development best practices.

**Web Researcher/Developer at Baidu, Inc.**
May 2014  -  August 2014 (4 months)

1. Maintained Baidu Voice Site (yuyin.baidu.com), developed and configured jQuery plugins to show the animations

2. Developed TV Game Site (tvgame.baidu.com), wrote all of the HTML5, CSS3, JS files of this project;

3. Wrote pages in the virtual handle app of TV Game, including interaction JavaScript program based on Zepto.js

4. Used Search Engine Optimization (SEO) technologies to promote the rankings in the search engine

---
