WORK EXPERIENCE

Software Engineer
IBM   -   Austin, TX - July 2015 to Present

Worked as a full-stack developer on IBM Spectrum Control Storage Insights, a Java based web application.
o Spectrum Control provides analytics for large scale storage environments utilizing data gathered from a variety of storage systems.
• Responsibilities include: probing and storing data, transforming raw data into charts/tables/graphs using REST
APIs, and helping design aspects of the user interface. Development is done primarily in Java, but I also work extensively with SQL and Javascript.
• Scrum Master for a team of 15 people in 3 different countries and several different states.
