WORK EXPERIENCE

Software Engineer
Groupon   -   Chicago, IL - October 2014 to Present

Lead development of new features and npm modules for cross team initiatives. Contributed to build and CI tools. Planned and story mapped features, wrote stories and AC. Worked extensively with Node and Express to build pages and services for Groupon's search, browse, and homepages.

Founder, Developer, Analyst
On Behalf   -   Chicago, IL - March 2014 to Present

Brought together a team of volunteers to build a site showing who funds your national representatives. (www.onwhosebehalf.com) Analyzed voting data to build understanding of voting habits.

Front End Developer
On Behalf   -   Chicago, IL - March 2014 to October 2014

Maintain parts of an existing applications built in Backbone and Require with LESS and Handlebars for styles and markup. Work with a team to architect and build applications and modules. Write tests in Jasmine for all new code. Refactor existing code with better separation of concerns and tests.

Javascript Developer
Kaplan   -   Chicago, IL - July 2013 to March 2014

Developed parts of a web application using EmberJS, Ember Data, Stylus, and Handlebars. Architected parts of the application used by multiple team members. Performed Scrum master duties. Worked with Node and Express. Built Ember template precompiler Middleware. Used Git in a well structured branching system. Lead small team of front end developers.

Front End Developer

Tribune   -   Chicago, IL   -   January 2013 to July 2013

Built useful small JavaScript libraries used by our Scrum team. Created jQuery modules used throughout site. Lead small team of front end developers. Performed code reviews and helped other developers solve problems. Created templates using JSTL and JSP.

Developer, Cofounder

Pander Commander LLC   -   Chicago, IL   -   March 2012 to February 2013

Brought together a small group of talented developers to create a social startup. Built parts of our javascript library and plugins. Built PHP models with MySQL queries for our CRUD system. Began work on an iOS version of our application.

Front End Developer

Sears   -   Chicago, IL   -   July 2012 to January 2013

Worked on a large team pinpointing, debugging and fixing javascript and css issues and creating promotional pages. Rebuilt the JavaScript module loader used by the team to render the home page on my own initiative. Spent time learning the ins and outs of Javascript.

Web and iOS Developer

Change Inc   -   Chicago, IL   -   July 2011 to July 2012

Sole developer for 14 person marketing company. Built client and experimental websites. Taught myself Objective C and developed two iPhone apps. Designed print media, interfaces, and motion graphics. Received Webby honorable mention for NetArt.

Graphic Designer, Videographer, Developer

AlphaMetrix LLC   -   Chicago, IL   -   December 2009 to July 2011

Worked on a small team doing interface, logo, and print design. Did web and flash development, filming, production, and motion graphics. Worked in Wordpress and a web content editor.

Achievements:
Spoke at js.chi() Meetup group
Webby Honorable Mention for Javascript Development in NetArt

Two published iPhone Apps
