WORK EXPERIENCE

## Test Engineer

Hewlett Packard   -   Bangalore, Karnataka  -  January 2007 to November 2008

HP (Hewlett Packard) is a well-known U.S. based company which supplies MFPs (printing products) all over the world. It provides a wide range of MFPs to meet different customer-requirements.
As a Test Engineer, I was responsible for various aspects of the application - MFP-CPE which is Multifunctional peripheral of application engineering by using advanced tools to deliver a quality product for our clients within the defined time frame.

Roles and Responsibilities:
• Developed Test Plan, Test workflows based on requirements and specifications defined by the Business product development team.
• Participated in requirement review meetings with the entire team.
• Executed end to end test scenarios to identify any gaps in the applications.
• Documented software defects in the bug tracking system and reported defect involving program functionality, output and content to developers.
• Provided teams with detailed analysis of bugs and recommended fixes.
• Created test defects and procedures to enable accurate replication and ensure compliance with standards.
• Transitioned software development efforts to a test-driven development process which brought QA testing in on the front-end of the development cycle for gains in code quality, software functionality and programmer productivity.
• Accelerated average QA testing turnaround time & received award for outstanding performance.

EDUCATION

## Masters in Computer Applications

V.T.U University
