PERSONAL STATEMENT

I am junior .NET / C# Developer looking to continue my progressive career with company which developing interesting projects.

I am writing quite good code with C# / .NET programming languages. And I have quite good basics of C/AL , Pascal, C, C++, JAVA programming languages. Also I am very familiar with SQL Management Studio, MySQL databases. I like to use command line on windows and linux as well.

Regarding Linux I can work with Centos OS quite comfortable.

CAREER ACHIEVEMENTS

- Fully created e-commercial website using Magento. This website functionality were to sell e-cigarettes and them components easily to clients and costumers of that website. By doing this project I became very familiar with php programming language, also I gain some experience with My Sql , ftp, hosting website. Also I got some business experience by doing sales of products, suppliers researching, costumers research.
  (12.2012)

- 1ClickFactory Academy – I was accepted to the NAV Track Students team. From 140 applications it was selected only 10 students. In this academy I learned basics of 2009 and 2013 R2 Nav. This concepts I learned in academy: UML, Business Management, Agile Project Management. Nav Functionalities: G/L Accounts, Sales, Purchases, Analysis overview, Inventory, Objects in NAV, code writing, internal functions, C/AL, Tools, Reports.
  (07.2014)

- In 1ClickFactory I was responsible for creating new features to automate testing progress. With company internal program I added many features by writing C# code and using WPF. This improved quality and time saving with partners solutions testing.
  (05.2015)

- Partisan of Xamarin software in company. I was creating vehicle parking application for all native operation systems. Also I did presentation of Xamarin basics in company.
  (05.2016)
